Digital Transformation

*Empowering service providers
to integrate voice, video
collaboration and Instant
Messaging in the customer's
business process*

Communications as a Service

Amiba empowers communications service providers in the SME market. Tens of thousands of businesses use Amiba software to connect mobile, dynamic teams with their customers, securely, anywhere, on any device and on any network. Collaboration works across voice, video, conferencing, on-line meetings and instant messaging in all sectors and in integrated contact centres. The Amiba cloud-based carrier-grade platform connects with leading CRM packages to optimise business performance.

Easy to use

Intuitive interface across all devices: smart phone apps, web portal, desk-top phone and Windows PC soft phone.

Flexible and Scalable

Add, remove or reallocate users at any time. Apply different functionality as the needs of the organisation change. Bug fixes and software maintenance are carried out for you automatically and are covered by the monthly fee.

Save time, energy and money

The cloud-based communications server can be established and configured rapidly. There's no energy-consuming on-site box, thus avoiding capital expenditure. You pay only for the services you use each month.

Responsive design

The applications scale for best fit on the device being used.

Collaboration with screen sharing

Video conferencing and screen sharing available to all PC and Mac participants. Android devices may see other parties shared screens, but cannot share their Android screen to other parties.

Instant messaging

Chat for all users with a permanent record of all chat sessions.

Communicate from any device, anywhere

Smart phones and tablets (iPhones/iPads and Android devices), as well as Windows PC softphones and desk-top IP phones have full UC functionality.

Highly secure

All media streams between devices and the PBX are encrypted.

Provisioning Server for Yealink and Polycom phones

An integrated server for Polycom VXX and Yealink phones auto-provisions SIP credentials.

Microsoft 365 and G-suite integration

Click-to-dial contacts and calendar scheduling of audio and video conferences.

1 VIDEO CONFERENCE ON MOBILE PHONES

Video on Android phone

2 CONTACT CENTRE

Skill set wall board with banner display area and real-time KPIs

Typical industry applications:

- Project collaboration for dispersed teams
- Multi-site businesses
- Home workers and road warriors
- Contact centres for reports and wall boards
- Construction companies with mobile workers
- Financial services with BYOD smart phone
- Medical practices with periodic call peaks
- Health services with virtual hospital visits

Web-based operator console

Shows the presence status of all users and allows single touch dialling and instant messaging.

Audio and web conferencing

Meet-me audio and video conference rooms available for all users. External parties may be invited to participate and they don't need to install any apps!

Five nines reliability

Built on an MDS core that's already deployed within three quarters of a million businesses.

Integrated Contact Centre

Up to 400 agents among 50 skill sets, supervisors, wall boards and reports.

Hurricane feature

In the event of unforeseen weather, any user of the system can remotely change the Auto-Attendant announcements to reflect the changed circumstances for callers.

New look Chrome Extension

Provides a very simple and elegant user portal for voice, video, and instant messaging.

Trunk Traffic Bursting

Allows a site to burst past its maximum operator traffic limit to handle traffic peaks.

Parking Spaces for Calls

Calls can be parked and retrieved from designated Call Parking bays or from common parking lots.

Data Centre Geographical Redundancy

3 COLLABORATE ONLINE

Share screen to discuss plans with customers and have an independent instant message session, on Mac or PC

Collaboration across firewalls and continents

4 PBX DASHBOARD

Overview of all critical PBX performance parameters

5 SMART PHONE APPS IPHONE & ANDROID

Simple and secure registration of app

Easily handle multiple calls

Set up audio conferences

Call from your contacts

Voicemail

6 ENTERPRISE CLASS SECURITY

Virtual hospital visits on fully secure video connections

7 BROWSER BASED OPERATOR CONSOLE

Presence information on all extensions, with single-click access and call control

8 DESK-TOP SYSTEM PHONES

Integrated Polycom VVX desk-top phones.

Integrated Yealink desk-top phones
